Freshman User Journey Map

Expectations	School Gate	Main Road	Teaching Building	Canteen	Library	School Gate
Happy / Neutral / Unhappy	anxious					
User Actions	• Arrive the school gate excitedly, looking for the guidance or map • Try to recognize the buildings by paper map	• Find the WanderX Website and log into • Browse the homepage and select the buildings to go to	• Scan the building code and follow the AR navigation • Follow AR navigation to the destination	• Check the detail page in Canteen • Learn about the menu and meal distribution	• Follow the AR guidance and use ID card to enter • Ensure the different area inside	• Leave the campus and check the dormitory and room number
Pain Points	• Confuse about the large campus and the incomprehensible map • Worried about finding the classroom	• Complex map interaction interface • Worried about getting lost or walking longer road	• Expect the accurate location, worry about fail recognition • Strong outdoor light affects AR recognition and the deviation in the route	• Annoyed at the crowded queue of people • Wonder what to order	• Lack the location of infrastructure • Unaware of the detailed information of different stages	• Want to collect the common used buildings • Web page lacks interest
Product Chances	• Quickly locate the current position and generate the route immediately	• Simple guide interface • Generate the real-time optimal route based onn the selected destination	• Optimize the positioning function and AR outdoor recognition algorithm, and add the strong light mode	• Provide the menu and flavors • Add the meal collection function to quick order	• Introduce the functional area and the equipped infrastructure of each floor	• Add the achievement page to the personal interface • Add mini-games during users' free time
